

Computer Science 2 Project	Team Members:	YUSE, Kaela Louise
Group Progress Report		FLORES, Cean Jhee
4th Quarter		
(Week 1, 2, and 3) - March 20, 2026		
GOAL State your goal for the Week	DATA COLLECTED State/list the data collected relevant to your project	PROGRESS State the progress you have made so far by the end of the week
> Review remaining tasks		We were able to check and review the remaining tasks for our quarter project.
> Finalize list of features to implement		We were able to finalize the list of features that will be implemented and will be present in our project.
> Continue and complete feature implementation		The feature implementation continues with revisions and brainstorming on things that can still be added to the existing features. However, the list of the major features that will be implemented have already been finalized.
> Begin the development of our User Interface and its design		We have started to make a draft of the code of our front-end and back-end frameworks, which includes the UI and its design. However, it is not yet functional because there are errors and problems in the code which we hope to fix.
STRENGTH		
> Easy look in our areas for development		
> More insights on the structure of the code		
> Clearer documentation and project proposal		
> More insights on our methodologies		
AREAS FOR DEVELOPMENT		
> Formulas needed		
> Simpler view of the code		
> Avoidance of over-complication		
> Clearer objectives and plans		
> Integration of essential structures		
STRATEGY FOR SUCCESS		
> Cooperation and Teamwork		
> Consistency is Key		
> Clarity in the Code		

Computer Science 2 Project	Team Members:	YUSE, Kaela Louise
Group Progress Report		FLORES, Cean Jhee
4th Quarter		
(Week 4 and 5) - March 31, 2026		
GOAL State your goal for the Week	DATA COLLECTED State/list the data collected relevant to your project	PROGRESS State the progress you have made so far by the end of the week
> Continue and complete feature implementation		We are now trying to figure out on how to integrate or include the things that we have added to the existing features on the essential structures of our app, such as the code, frameworks, and the UI.
> Continue the development of our User Interface and its design		We have continued with further development of our frameworks and UI. Unfortunately, it is still not functional because of errors and problems that are still present in the code that need to be determined, debugged and fixed.
> Begin working and finalizing the documentation, README, and other necessary outputs		We are still in the process of working on our documentation, README, and other related outputs.
STRENGTH		
> Easy look in our areas for development		
> More insights on the structure of the code		
> Clearer documentation and project proposal		
> More insights on our methodologies		
AREAS FOR DEVELOPMENT		
> Formulas needed		
> Simpler view of the code

Group Progress Report		FLORES, Cean Jhee
4th Quarter		
(Week 6 and 7) - April 7, 2026		
GOAL State your goal for the Week	DATA COLLECTED State/list the data collected relevant to your project	PROGRESS State the progress you have made so far by the end of the week
> Continue and complete feature implementation		In both of these goals, the only main concern that we have is persistent problems on the code in our UI and frameworks which are still trying to be spotted and fixed.
> Continue the development of our User Interface and its design		
> Finalize the documentation, README, and other necessary outputs		We are currently reviewing and revising the documentation, README, and other related outputs along with the preparation for the project presentation.
> Prepare materials for the project presentation		We are now starting to prepare the materials for the project presentation and other related activities. However, there may be delays on this because of the continued development of the remaining essential structures of our project.
